SUMMARY

Frontend developer with a BSc degree in Psychology, skilled in building responsive websites and integrating APIs. Experienced in developing fintech, healthcare, school, and other types of websites using modern web technologies. Passionate about creating seamless user experiences with a focus on performance, accessibility, and security.

SKILLS

Languages & Technologies: HTML, CSS, Bootstrap, JavaScript, TypeScript.

Frameworks & Libraries: React, Redux.

Development Practices: Responsive Web Design, Performance Optimization, Accessibility, Search Engine Optimization.

APIs & Data Management: RESTful APIs, Authentication, State Management.

Tools & Deployment: Git (with GitHub, Vercel).

Soft Skills: Problem-Solving, Communication, Teamwork.

PROJECTS & EXPERIENCE

MedCare Plus- Designed a dynamic healthcare website that provides easy access to medical services, featuring an intuitive UI and smooth navigation for users seeking healthcare information.

Best Fit Academy- Created a dynamic school website with structured content presentation, enabling students and parents to access essential academic information effortlessly.

Wealth Exchange- Developed a modern fintech platform with secure authentication for real-time financial data, ensuring seamless user interactions.

Admin Dashboard- Built a data-driven dashboard that fetches and displays real-time data using RESTful APIs, accessible only to authenticated users, replicating data security
